Academic History

Kendriya Vidyalaya Danapur Cantt patna   Patna,India
                                                             August 2011-February 2023

- Demonstrated leadership as School captain.
- School top in class 12th.
- 10th- 95.33% || 12th- 91.33%(PCMB)

Indian Institute of Information Technology   Kalyani,India
                                                             August 2024- July 2028(Expected)

- Persuing B.Tech in Computer Science

PROJECTS

CarDekho - Car Buying and selling platform

- Developed a fully functional CarDekho-inspired website that allows users to explore, compare, and find cars(with the help of Data-analysics).
- Designed a responsive layout for better accessibility across devices. The platform provides car specifications, pricing details, and a smooth navigation experience for buyers.

Stone-paper-scissor Game

- I make a Stone-paper-scissor website game. Using HTML, CSS, Java Script.
- The Stone Paper Scissors game is a simple command-line game implemented. It allows a user to play against the computer in a classic Rock-Paper-Scissors battle.

Snake game using C language

- The Snake Game is a classic arcade game implemented using C programming with basic graphics handling through ASCII characters or libraries like ncurses.
- The game consists of a snake that moves in a bounded area, consuming food to grow longer while avoiding collisions with walls or itself.

Awards and Certification
